# Parents: does your child have Obsessive-Compulsive Disorder?

The **BRAVE Lab** at the University of Denver is testing a computerized program that **may reduce OCD symptoms in kids and teens.**

## **Does your child have symptoms of OCD? Do they:**

- ❖ **Have recurring thoughts that make no sense but makes them feel bad?**
- ❖ **Wash excessively or have a fear of germs or contamination?**
- ❖ **Have to do things over and over again?**
- ❖ **Check and double-check more than necessary?**

## **Eligible kids and teens:**

- ❖ **Are ages 10 to 17**
- ❖ **Have access to a computer and internet at home**

## **Eligible youth may receive:**

- ❖ **A free mental health evaluation**
- ❖ **A four-week computerized training program that may help them feel less worried, nervous, scared, or stressed.**
- ❖ **Families receive free parking and compensation for study visits.**

**For more information, call [\(303\) 871-6448](tel:3038716448) or email [BraveLab@du.edu](mailto:BraveLab@du.edu)**

This study is being conducted by Dr. Michelle Rozenman, Ph.D., Department of Psychology, University of Denver
